

JOHN JACOB M. MULI

Cebu City, Philippines | jacobmuli0729@gmail.com | +63 960 038 4364 | github.com/japanesebonsai

SUMMARY

Third-year Computer Science student at Cebu Institute of Technology - University with experience in full-stack web development, Android development, data science, and AI/LLM integration. Consistent Dean's List achiever with hands-on experience building production-ready systems.

EDUCATION

Cebu Institute of Technology – University

Bachelor of Science in Computer Science | 3rd Year

2023 – Present
Cebu City, Philippines

- Consistent Dean's List / Honor Roll

TECHNOLOGIES & SKILLS

Languages: Python, C++, C, C#, Java, JavaScript, TypeScript, Kotlin, SQL

Frameworks & Tools: React, Next.js, Supabase, LLM APIs (GPT, Gemini), Vercel, Ollama

Concepts: AI/LLM integration, multi-agent systems, full-stack web development, mobile development, data visualization

PROJECTS

Kumpas — Multi-AI Specialist Career Assessment System

Feb 2026

Next.js, Gemini API, Vercel | 2nd Runner Up — Innovation Cup Cebu 2026

- Won 2nd Runner Up at Innovation Cup Cebu 2026 — selected from 50 competing teams, with only the Top 15 advancing past the preliminary round, followed by an 11-day development sprint.
- Engineered a five-AI specialist pipeline grounded in Philippine labor market data (DOLE/CHED), with Gemini's multimodal vision layer parsing NCAE/NAT records before routing to three parallel career specialists.
- Deployed a production-ready analysis page to Vercel via Next.js, implementing PII redaction, structured NCAE/NAT transcription, and one-click PDF export for counselors.

FIES Household Socioeconomic Segmentation Dashboard

Dec 2025

Python | Streamlit | scikit-learn | pandas | PCA | joblib

- Built a K-Means clustering module for Philippine household income/expenditure (FIES) data, segmenting families into socioeconomic groups using engineered income, spending, housing, and asset features with PCA dimensionality reduction.
- Optimized Streamlit dashboard performance by precomputing and caching trained clustering artifacts with joblib; corrected a double log-transformation preprocessing bug and revised cluster interpretations for clearer socioeconomic analysis.

StepSync — Mobile Fitness Tracker

May 2025

Kotlin, Firebase, Android

- Optimized background battery efficiency by 80% by engineering a dynamic sensor-polling system that gracefully degrades from dual-sensor fusion to single-sensor (accelerometer-only) tracking during device low-power states.
- Built a full-stack Android app tracking steps and calories burned using the phone's pedometer and gyroscope, with Firebase as real-time backend for logging and retrieving user activity history.

EXPERIENCE

IT Student Assistant

Jun 2024 – Aug 2024

Cebu Reliable and Excellent Seafarers Training Center, Inc. · On-site, Metro Cebu

- Executed functional and responsiveness testing for a student LMS, verifying project requirements and documenting bugs and UI/UX improvements.
- Assisted in maintenance of a ship handling simulator, performing diagnostics and system checks to ensure operational readiness.

ORGANIZATIONS & VOLUNTEERING

Community Engagement Officer

2025 – Present

Google Developer Groups on Campus (GDG)

- Spearheaded attendee engagement and designed interactive session materials for a GDG technical workshop, providing on-site coordination and support.

MIS Developer — Volunteer

Oct 2025

Angat Buhay (Angat Pinas, Inc.) · Disaster & Humanitarian Relief

- Co-developed an emergency MIS within 3 days of the 6.9M Cebu earthquake, centralizing logistics routing and real-time data management across 245 affected barangays in Cebu Province — reducing coordination overhead for relief operations.

CERTIFICATIONS & COMPETITIONS

HCIA-openGauss V1.0 — Huawei · Database admin: operations, installation, user management, SQL · Nov 2025

HCIA-openEuler V1.0 — Huawei · Linux OS admin: operations, installation, user management · Nov 2025

10th Huawei ICT Competition 2025–2026 Philippines — Computing Track National Stage Competitor · Nov 2025

Java OOP & C Programming Certifications — CodeChum & CIT University · May 2024 – May 2025
